## Education

|                                                                                                                     |                     |
|---------------------------------------------------------------------------------------------------------------------|---------------------|
| <b>Indian Institute of Information Technology, Kota</b>                                                             | Dec 2020 – May 2024 |
| <ul style="list-style-type: none"><li>Bachelor of Technology in Electronics and Communication Engineering</li></ul> |                     |
| <b>Nav Jyoti Senior Secondary School, Rewari</b>                                                                    | 2018                |
| <ul style="list-style-type: none"><li>10th and 12th from Central Board of Secondary Education</li></ul>             |                     |

## Experience

|                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                      |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------|
| <b>Research Experience</b> Detecting depression from EEG signals using AI and machine learning techniques                                                                                                                                                                                                                                                                                                                                             | June 2023 – Dec 2023 |
| <ul style="list-style-type: none"><li>Research Role: Collaborated as a research assistant under Professor Ashish Kumar at Manipal University, working alongside PhD students on advanced projects in mental health.</li><li>Conducted a review of academic research papers.</li><li>Utilized a publicly available dataset from Kaggle and Performed analysis on the data.</li><li>Using machine learning algorithms like Linear regression.</li></ul> |                      |

## Projects

|                                                                                                                                                                                                                                                                                                                                                                                                                                                        |           |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| <b>Personal Portfolio Website</b>                                                                                                                                                                                                                                                                                                                                                                                                                      | Live Demo |
| <ul style="list-style-type: none"><li>Developed a personal portfolio using HTML, CSS, and JavaScript.</li><li>Integrated responsive design with media queries (mediaqueries.css) to ensure compatibility across devices.</li><li>Organized project assets and created dynamic interactions with script.js.</li><li>Utilised custom styles (style.css) to enhance user experience and visual appeal.</li></ul>                                          |           |
| <b>Email Authentication</b>                                                                                                                                                                                                                                                                                                                                                                                                                            | Live Demo |
| <ul style="list-style-type: none"><li>Built MERN authentication with signup, login, logout, and protected routes.</li><li>Implemented email verification flow with token, link, and verify endpoint.</li><li>Added welcome and verification email templates with automated sending.</li><li>Developed forgot-password and reset-password using secure, expiring tokens.</li><li>Integrated MongoDB user storage and deployed full stack app.</li></ul> |           |
| <b>Real-Time Chat Application</b>                                                                                                                                                                                                                                                                                                                                                                                                                      | Live Demo |
| <ul style="list-style-type: none"><li>Built a real-time chat app using MERN, Socket.io, TailwindCSS, and Daisy UI.</li><li>Secured authentication and authorization with JWT.</li><li>Integrated RESTful APIs for user and message operations.</li><li>Enabled real-time messaging and online status with Socket.io.</li><li>Managed state with Zustand and deployed with error handling on client/server.</li></ul>                                   |           |

## Technologies

**Languages:** C++, JavaScript, SQL, Python.

**Tools:** MongoDB, Express, React, Node.js, VS Code, Postman, GitHub, Linux, Docker, CI/CD.

**Concepts:** OOP, SOLID, Design Patterns, System Design (basics), REST APIs.

**Coursework:** Data Structures and Algorithms, DBMS, Operating Systems, OOP, Computer Networks, Mathematics.

**Soft Skills:** Quick learner, Analytical Thinking, Problem-Solving, Communication, Team Collaboration.

## Achievements

**Hackerrank :** (SQL Certificate)

**Leet Code :** Resolved over **250+** problems, including **150+ medium** difficulty problems.
